

MEDASSIS TECHNOLOGY: Innovative Solutions for Medical Operations

Medassis remains at the forefront of innovation, leveraging cutting-edge technology to ensure seamless, real-time communication and maximize coordination in complex medical operations. This document outlines the key technologies Medassis utilizes and offers to partners, including FlightTrack, CaseWatch, and SecureCom.

Medassis: Leveraging Cutting-Edge Technology

At Medassis, we remain at the forefront of innovation, leveraging cutting-edge technology to ensure seamless, real-time communication that maximizes coordination. In complex and time-sensitive medical operations, our advanced systems enable efficient logistical management, allowing us to deliver exceptional service to our partners.

Key Technologies Offered by Medassis

Here are some of the key technologies we utilize and offer to our partners:

Medassis FlightTrack

Our real-time flight tracking app displays your fleet on a global map, giving your call center or management team complete control and oversight of operations in real time.

Medassis CaseWatch

This app allows insurance companies to monitor all open cases, providing detailed, real-time updates to all involved parties.

Medassis SecureCom

The emergency communication platform enables real-time audio and video interaction, precise location tracking, and multi-way communication between callers and emergency services.

Medassis FlightTrack: Real-Time Fleet Management

Medassis FlightTrack is our real-time flight tracking app that displays your fleet on a global map, giving your call center or management team complete control and oversight of operations in real time. This powerful tool allows for efficient management of resources and ensures that all parties involved in medical operations have up-to-date information on fleet movements.

Medassis CaseWatch: Comprehensive Case Monitoring

Medassis CaseWatch is an app that allows insurance companies to monitor all open cases, providing detailed, real-time updates to all involved parties. Push notifications keep participants informed of any developments, ensuring a seamless flow of information, including the secure sharing of medical files. The app is protected by two-factor authentication and advanced security measures to ensure patient privacy is never compromised.

1

Real-Time Updates

CaseWatch provides detailed, real-time updates to all involved parties, ensuring everyone has the latest information.

2

Push Notifications

Participants are kept informed of any developments through push notifications, ensuring a seamless flow of information.

3

Secure File Sharing

The app allows for the secure sharing of medical files, maintaining patient confidentiality.

4

Advanced Security

CaseWatch is protected by two-factor authentication and advanced security measures to ensure patient privacy is never compromised.

Medassis SecureCom: Emergency Communication Platform

Medassis SecureCom is the emergency communication platform that enables real-time audio and video interaction, precise location tracking, and multi-way communication between callers and emergency services—enhancing response times and safety on a global scale.

Real-Time Interaction

SecureCom enables real-time audio and video interaction, allowing for immediate and clear communication in emergency situations.

Precise Location Tracking

The platform provides precise location tracking, ensuring that emergency services can quickly and accurately locate those in need of assistance.

Multi-Way Communication

SecureCom facilitates multi-way communication between callers and emergency services, enhancing coordination and response effectiveness.
